IMPORTANT NOTICE

Due to big change of the name of recyclable materials applied for inspection in Electronic Management System for Pre-shipment Inspection of Recycling Scraps to China (E-PSI), new requirement of filling the Inspection Application Form is hereby needed. So we'd like to make a notice to all the parties concerned,

When filling the Inspection of Recycling Scraps to China through E-PSI, it should be noticed that except choosing the correct category of the cargo, the sub-category should also be chosen correctly. That is, when choosing the cargo category in the Inspection Application Form, after choosing cargo category in **Determed The Category Include**, the sub-category should also be chosen correctly according to the content and main purpose of use of the cargo.

When engendering certificate automatically through E-PSI, the Scrap Category will be what the applicant put in the Inspection Application Form. And when the cargo arrives in China, the officials from relative Chinese authorities (Customs,

CIQ, etc.) will inspect the cargo according to the information in the certificate. If the cargo is not the same as describes in the certificate, the clearance of customs of the cargo will be affected and extra fee will be have to be paid therefrom.

So please be careful and choose correctly the category of the cargo (scrap) according to its actual condition.

Please don't hesitate to contact us if having any problem. Call 0034-934677283 or write e-mail to spain@ccicspain.com or certi@ccicspain.com.
